

Submitter: Ryan Hossner

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2963

All of the green targets in the world amount to sound and fury without material investment in practical, scalable solutions. Regular folks are being squeezed from every direction, even as ecological collapse unfolds in our towns and forests, in wild and urban spaces alike. It is time for the legislature to invest in micromobility solutions that will decrease our dependence on fossil fuels and ever ballooning trucks and SUVs. Pay up!
