

Submitter: Christian Garver

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2963

My name is Christian Garver, and I'm a resident of Portland, Oregon. I'm here today to express my strong support for policies that promote and protect micromobility options, including e-bikes.

As a daily e-bike user in Portland, I understand the real-world benefits these devices provide. They reduce congestion, lower emissions, and offer a convenient and affordable transportation alternative. Our representatives need to hear from those of us who ride and work with e-bikes that we support these policies.

I urge lawmakers to prioritize the development of a comprehensive micromobility strategy that addresses safety, accessibility, and infrastructure needs. Thank you for your time and consideration.
