

Submitter: Alison Dennis

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB2963

This bill is an important step in supporting greater micro-mobility and low carbon transportation options in the region, which is of the utmost importance as we combat climate change and seek to create a more equitable and livable future. We must not only pave a way for more transportation options in Oregon, but also make sure that these more environmentally sound and efficient means of transportation are accessible to everyone. This bill helps bridge this accessibility gap.
