Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

I support HB 3075 insofar as it will bring subjective standards for police to arbitrarily deny permits to blacks as well as create more victimless crimes to further drive mass incarceration of those blacks. The permit system is perfect, especially if it is expensive and time consuming, as blacks will be prevented from getting those permits. Then you can arrest them for not having permits! You can even arrest people for having magazines over the magic number and then induce them to plead guilty even though it would be impossible to prove when those magazines were actually manufactured. Wonderfully thinking. I applaud Representative Kropf for being as racist as I am.
