

Submitter: Mike Farrell
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3626

I support HB 3626.

I own an ebike and use it to commute 17 miles each way to work. I found getting my ebike transformational in how I commute and use transportation around the city. I believe HB 3626 will help more people understand ebike and micromobility. It might encourage people to try it more, especially if they feel it can be done safely. Raising awareness on the streets of what are the options and how to do it safely can be one way to reduce our carbon footprint and slow down climate change.

thank you.
