

Submitter: Chad Kernutt
On Behalf Of: WE THE PEOPLE
Committee: Senate Committee On Finance and Revenue
Measure, Appointment or Topic: SB681

Dear Lawmakers,

My name is Chad Kernutt and I oppose SB-681.

Some folks told me that in 2013 the Arctic Ice Cap would disappear. By 2014, it added around 530,000 square miles of new ice. The weather is now the main talking point, even though we've had these seasons of extreme weather for generations predating the industrial revolution. You might know them; they're called hurricane, tornado, and drought seasons. Even then, in 2013-14, it was the calmest hurricane season in 30 years. For tornados, it was the quietest in 60 years. Has there been more activity since then? Sure, but it circles back to this point: these things are cyclical. If industrialization causes so-called global warming, than please explain the Medieval Warm Period to me which saw so much drought. It lasted for 500 years.

Global warming has not been panning out for the liberals who run our state and country with their disaster and end of the world dates constantly changing when the times come and pass and their predictions have failed. So rather than see the deceptiveness in the concept, they pursue, full-steam ahead, under Climate Change. Are you guys aware that annual wild fires that have always been burning on the same average since the worlds creation pump out a yearly average of 3 times as much carbon and CO2 emissions as man creates? Did you know that when you add mans carbon and CO2 output and footprint to the yearly average from wild fires that it makes no noticeable atmospheric and climactic difference? Did you know that wild fires, floods, hurricanes, tornadoes, droughts, blizzards/freezes, and monsoons are continuing at the same cyclical pace that they always have?

Folks God controls the weather and He's already told us how the end happens in the book of Revelations. He brings the fire. Not mother earth and climate change and global warming. The funny thing about this whole science is fact crowd which the liberals constantly stick to in loctite fashion, is that the science and scientists who always seem to be atheists and anti-God just keep getting it wrong and have to keep coming up with new models to fit their narratives. Look at the earths temperatures and climate the last 6 thousand years since creation folks, there is a whole bunch of consistency going on there with a current trend to things getting colder. Read the bible people, the end is near and we don't bring it about, God does!! All this is going to do is add tremendously to the states PERS debt and funnel state funds and tax dollars into democrat friendly unions and democrat interests and pet projects which in turn funnel money into their own election campaigns. Climate change and global

warming alarmism is one big crock and scheme and WE THE PEOPLE dont want our taxes, our PERS money, and our wallets to be any part of it!! The democrats in the legislature have already added taxes on PERS workers recently to offset the growing PERS debt from liberal fiscal mismanagement. Let's not make matters worse by not investing in things that give good returns and instead only investing in money pits that bankrupt PERS and will only lead to more taxes on PERS workers. Please vote NO on SB-681. Thank you.

Sincerely,
Chad Kernutt
