Measure, Appointment or Topic: HB3075

The bill reintroduce the controversial measure again. It restricts aims to restrict people's rights to bear arms and defend themselves. Moreover it will not stop any criminal from committing any crime so why do you introduce it? To criminalize those of us who care about the law? This is a natural human right that you seek to violate, which means short of my consent, you have no authority to violate it. Enough with this constant abuse and attacks.
