

Submitter: John Livingston

On Behalf Of:

Committee: Joint Committee On Ways and Means

Measure, Appointment or Topic: HB5006

Our climate has changed a lot since the 1970's. We need to fund our commitment to climate action. I am willing to pay for better climate coping actions. We need more funding to encourage both private individuals and companies to invest in electric vehicles. We need school and public busses that run solely on electricity. We need to tax trucks that drive thru Oregon and do not pay for the emissions they create to our air quality. We need to keep pushing forward with actions to mitigate climate change and to putting more CO2 into the air.
