Please support this bill and give some seniors some relief. We represent a large voting block of Baby Boomers, so keep that in mind. After surviving through Sleepy Joe's four reckless years of wars, climate spending, attacks and fossil fuels, high inflation (9% at one point) and what has become known as the "affordability crisis," seniors need a break and this bill comes just in time. The Democrat Party approval rating is in the toilet and you have no leader looking out for the middle class. Three recent polls, including your favorites, CNN and NBC have the Democrat party approval in the low to mid-20% range. Wow!

And, stop investing our pension funds in ESG funds. That is not being a good fiduciary.

Thank you.
