

Submitter: Laura Ouellette

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

Please support HB 3932. We are witnessing the continual degradation of our environment. The beaver population is a fraction of its historical prevalence. Protecting beaver has been shown repeatedly to mitigate harm to watersheds, has helped with wildfire suppression, and improves ecosystems. I understand that an individual beaver can inconvenience a land owner, but overall, the benefits are profound. We need to learn how to live with beaver, after all, we are the beaver state! Thank you!
