

Submitter: Carolyn Gilman-Garrick

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

Please support HB 3932. It is a common sense bill pending in the Oregon Legislature that prioritizes improving water quality in Oregon streams by protecting beavers. This bill stops the trapping of beaver on waters the Oregon Department of Environmental Quality has determined have "impaired" water quality. Beaver dams have been shown to improve water quality. I am a member of ONDA and I support this bill.
