

Submitter: MARGARET HERRINGTON

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3932

There is ample evidence of the positive benefits of beavers and their activity in our waterways. We should do whatever is in our power to encourage their existence and activity which has been shown to have direct health benefits to humans. I am a member of ONDA (Oregon Natural Desert Association) and support their restoration efforts which come at no cost to Oregon taxpayers. Please pass this bill which will return health benefits to us all, thanks to our hard-working beaver population.
