Measure, Appointment or Topic: SB1051

I strongly oppose this bill.

As a commissioner on the third largest timber producer in the state and who's sensible and knowledgeable management is of critical importance due to the constant "shrinking basket" of available lands to sustainably harvest, it would be irresponsible and destructive to the environment to not let the timber industry appoint their representative.

In light of the EO from the administration for higher production, this is more important than ever.

Warmly,
Commissioner David Loveall
Lane County District 2
Springfield
