

Submitter: Craig Nelson

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3422

Greetings House Committee On Climate, Energy, and Environment,
I have lived in Oregon for nearly 30 years. I left your neighboring state to the south in search of a place that had not abandoned their legacy of preserving quality of life. A place that encouraged the balance of agriculture, wildlife, and recreation, with the necessary development of resources such as energy. I believe I am seeing a degradation of the commitment to these balances that made Oregon stand out as a place where I wanted to move my family. Farmland should be preserved, it cannot be replaced. I support HB3422.
