

Submitter: Gail Sabbadini

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3932

I support protection of beavers on public lands where there is aquatic restoration work needed. Their work not only improves water quality and biological diversity, it also slows water loss and allows aquifers to recharge. This Oregon native keystone species is extremely beneficial, works quickly and for free.

Thank you for considering support for HB3932.
