

Submitter: Nancy Brown

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3932

I support HB-3932 because I am concerned about what seems like constant assaults on Oregon wildlife and ecosystems through overuse, illegal hunting, or the myriad other ways people cause damage. While I do not have faith this will stop illegal trapping, it at least provides recourse for punishing those who do. Please pass HB-3932 and help protect a key partner in maintaining the health of our ecosystems. Thank you.
