

Submitter: Cam Wolff

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

I am a retired environmental educator, have been a supporter of ONDA for many years, and because I understand the importance of diversity to the health of any ecosystem I know how critical it is to the health of waterways in this state to make sure beavers can safely return to places they historically lived in. They will only help rehabilitate water ways and aquifers for the future.
