

Submitter: Tristen Jurek
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3932

Dear Chair, Vice Chair's and members of the committee.

I'm writing this to oppose HB3932. This is a wildlife issue. Oregon legislators have already appointed this back to the commission it's called the ODFW beaver management plan. In 2022. Mandated reporting has taken place for several years now. Being able to trap beavers is important to the economy for many reasons including preserving agrichow it is. With an abundance of beavers you will see flooding everywhere which will cause several issues. Please look into this matter a bit further. Thank you for your time and consideration.

Sincerely,
Tristen Jurek
