

Submitter: Dean Sigler

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

I live in a flood plain area. Former neighbors used to shoot the beavers that were building dams and lodges near my back yard. Thankfully, the neighbors left and the beaver population then thrived. My area has been flood-free for the last 40 years, at least partly because of our local beavers. I strongly support this measure.
