

Submitter: Seth Elliott

On Behalf Of:

Committee: House Committee On Early Childhood and Human Services

Measure, Appointment or Topic: HB3835

I support HB 3835 because it represents a thoughtful and compassionate alternative to a once heroic deinstitutionalization movement that has sadly become a hammer looking for nails to pound, including even common-sense intervention and developmental science. HB 3835 is a path to wise intervention, institutional stability, and individual well-being for both those providing services and those receiving them. Please vote yes. Thank you.
