

Submitter: Jonathan Kirsch

On Behalf Of:

Committee: House Committee On Behavioral Health and Health
Care

Measure, Appointment or
Topic: HB3134

Physical Therapy as a first line treatment helps reduce healthcare costs and improve patient outcomes. Barriers, such as prior authorizations, can lead to patients delaying their care until the injury is more significant. This can necessitate longer bouts of Physical Therapy and other more expensive/invasive treatments. Prior authorizations also increase the administrative burden on medical providers and insurances alike. Please support this measure to promote early access to low cost conservative care so that we can improve the quality of life for our communities and make every life and active life. Thanks!
