

Submitter: Stephanie Ring

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB301

Approving SB 301 is the a step in the right direction, which offers the chance to open up the Newberg pool to all river users and recreationalists, in a safe and efficient atmosphere. The Newberg pool region is so restrictive that basically only a few elite users have the opportunity to use it. Similar to Lake Oswego, the Willamette river is a public waterway and should have equal opportunity for use & recreation. SB 301 is a step in the right direction.
