

Submitter: Stephen Bruss

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

I am not a trapper; however, I strongly oppose HB3932. Wildlife management should remain with the trained experts such as the biologists at the ODFW. If they deem that trapping should be prohibited then I'm totally on board. If they believe it should be allowed then I am also totally on board. I give my trust to them 100%. This and similar decisions should strictly be 100% left to the professionals who we employ and know their field. Thank you for your consideration.

Sincerely,
Steve
