

Submitter: Larry Armstrong II

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3932

HB3932 attempts to replace science with politics in wildlife management decisions. I oppose this idea as historically wildlife management in the hands of politicians does not have the results that we need. Please trust in the biologists of ODFW to continue science based management methods.

Thank you,
Larry Armstrong II
