

Submitter: Russel Rogers
On Behalf Of: NA
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3932

I oppose HB3932 because wildlife management should remain with the trained experts at the ODFW Commission, not legislators. You have people trying to do what we already have trained biologists doing. Trying to manage wildlife through legislation is as bad as doing it by ballot box. You end up with people messing with things they know squat about. Let the biologists do their jobs.

Respectively,
Russel Rogers
