

Submitter: Deborah Scott
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3932

Dear Chair Rep. Lively, Rep. Vice-Chair Gamba, Rep. Vice-Chair Levy and members of the committee,

Please support HB 3932 to allow nature's engineers —beavers — to help restore Oregon's thousands of miles of impaired waterways for free.

Beavers' canal-digging and dam-building help slow water flow, restore impacted water tables and underground aquifers, create natural wetlands that filter toxins, and create wildlife and fish habitat at the same time.

Passing HB 3932 would allow beavers to help restore these waterways by closing hunting and trapping of beavers on these impaired waterways on public lands. There is robust scientific evidence that shows beaver dam complexes can address most of the water quality issues of concern. This bill is NOT about limiting beaver harvest and increasing beaver population. Instead, this bill would enable beavers to access waterways where they need to be and remain long enough to perform their ecosystem functions without getting trapped out.

Sincerely,
Deborah Scott
