

Submitter: Owen Bacon

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

Please oppose HB 3932. The scientific evidence does not support this ban of beaver trapping and this is why the ODFW commission has voted no on this ban multiple times in the past. Beaver populations are doing great. Let's continue letting ODFW make decisions on beaver management and other wildlife management, because they are the experts.
