Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3932

Beavers are an important party of the history and ecology of our state. It is such a joy to encounter these industrious and peculiar creatures in the wild. And yet, while they were once common, I rarely encounter them today. I get outside a lot and explore forests around Oregon as a hiker and federal forest surveyor and I would love to see more beavers on my jaunts in the future and I think this legislation will help make that possible. Thanks
