

Submitter: David Johnson

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3932

I oppose this bill on account of lack of scientific evidence to support beaver trapping as detrimental. Trapping is not very widespread in Oregon eliminating beaver trapping from the small minority of trappers is unfair when there is no evidence that beaver trapping has any impact on the population

Thank you,
David Johnson
