This bill, as with most of what Salem's Lot is, without any sane individuals doubt, going to pass in their efforts towards the distillation of the 2nd Amendment to meaninglessness, (unless the Republicans grow a collective pair and walk out, denying the quorum. Fat chances have a better chance of that happening, but, hey, a guy can dream right). and is as well, as unworkable as all of its current crop of Citizen beating bills, in any realistic, practical, real world scenario. The time frame loopholes like "Must immediately...Except for" are in the text and clearly meant to create an open ended time frame that will be used forth with by the State Police. I am not an enemy of the state, but rather the states body politics very obvious intent to literally steal the Civil Rights of the Citizenry, unfortunate to find ourselves in your avaricious cross hairs. No, of course, on this as well as all of Salems Lot's unworkable firearms legislation. But this is a puppet show, put on to pretend you give a shite' about anything but what personally enriches, or advances the careers of, this gone astray body politic. What a way to ruin a perfectly lovely state.
