I OPPOSE HB 3940

Combining so many taxes in one bill is a disservice to what is acceptable and what is not. Where are the bills to stop the mismanagement of forest that would reduce wildfires? Burning up money is not a fix to the underlying problem.

I object to the current trend of making taxes adjust with the Consumer Price Index or any index. This is an increase in taxes without representation, particularly when it doesn't allow for a downward adjustment as in this bill. Nor does it take into account extenuating circumstances - such as the lockdown during the pandemic. This method is a new virus that Democrats are spreading in most of their bills.
