

Submitter: Paul Furnari
On Behalf Of: People who understand risk management
Committee: Senate Committee On Judiciary
Measure, Appointment or Topic: SB243

Here we go; what was once a placeholder study bill (wink wink) now has an extensive amendment containing the most unconstitutional elements of several other tired and ineffective anti-gun concepts and- surprise!- this comes a day before a hearing, and apparently without any legislators brave enough to put their name to it. Shocking. The fact that this underhandedness is even taking place should tell you all you need to need to know about the value of this excrement. None of this will save any lives- none of it. Instead, it does nothing more than deprive honest people of their rights as described in the U.S. and State constitutions. Tell me why concealed handgun licensees- a demographic with an arrest rate of .00008 (far better than democratic legislators)- deserve to have further restrictions placed on them? Tell me why law abiding citizens need a waiting period to exercise a right bestowed on them not by their government, but by the mere fact of their existence? Tell me why people who can vote, drive, and die for our country can no longer possess a hunting rifle?

If we wouldn't tolerate similar infringements on our freedom of speech, why would we allow this bill- promulgated by smooth brain party apparatchiks- to even see the light of day?
