

Submitter: Karen Griffith

On Behalf Of:

Committee: House Committee On Behavioral Health and Health
Care

Measure, Appointment or
Topic: HB3134

I am in support of HB3134. As a nurse practitioner I saw how important it is to get a test when ordered so a treatment plan could be developed and implemented without delay. As a patient needing physical therapy after an injury and then needing continued therapy after surgery, being told I would need to wait for pre-authorization was discouraging and stressful. Please pass this bill on to be considered by the full legislature and hopefully passed.
