

Submitter: Kristen Heasley  
On Behalf Of: Myself and everyone who needs medical care to  
buil  
Committee: Senate Committee On Health Care  
Measure, Appointment or Topic: SB535

My husband and I are part of the 1 in 6 who need medical care to start a family. I spent a long time wondering "Why us?" And I know now that infertility can happen to anyone. Your sister. Your daughter. Your niece or nephew. It is unfair and painful beyond belief.

Infertility is a disease, recognized by the American Medical Association. Demand insurance companies cover treatment for this disease like any other! Fertility care is an essential healthcare service. Please and thank you for supporting this bill.
