

Submitter: Bethany Neeley

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: SB163

I deeply support SB 163. While I am not a donor conceived child, a donor, nor a recipient parent, their cause has become dear to my heart. They are largely treated as products to be sold, and not the real life humans they are, and giving them more rights is the only right thing to do. As proven by many other countries who have a more regulated donor conception industry, open ID donors only improve outcomes. Knowing your medical history is so important, and can be a matter of life or death - something that is well proven by the donor conceived community. Most anyone who opposes this bill simply doesn't understand it's purpose, or what life looks like currently.

Please support this bill and show how Oregon cares for their people - no matter how they were conceived.
