

Submitter: Debra Kennedy

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

The last eight years have seen a severe decline in the belief that elections using mail in ballots are fair and secure from fraud. In person voting and requiring voter ID are both methods of establishing confidence in the integrity of election administration. Support for these methods have risen amongst members of all parties, according to various national polls. The opportunity to vote on returning to in person voting with voter ID needs to be referred to the people of our state.
