

Submitter: Robb barnett  
On Behalf Of: SB210  
Committee: Senate Committee On Rules  
Measure, Appointment or Topic: SB210

To whomever this testimony is read by:

I support the bill SB210 that requires in person voter I.D, that keeps all non citizens from voting that are NOT legal to vote.

We need to go back to the old system of voting at a public place, (ie) library, courthouse, state office, federal office that supports legal citizens with I.D to vote fairly, AND LEGALLY!

The mail in votes have become compromised by to many criminals, as well as in my opinion tyrannical individuals who have proven to illegally influence votes. Our current voting system has become broken, and untrustworthy...

the bill SB210 seems to be a better option, and shown worth to go back to legal individuals to monitor all voting booths as it was done before in early yrs, I am a legal state citizen that supports rule of law that can better, and support our trust in them, and those with genuine standing to be for the people, and NOT support undocumented or illegal individuals any abilities to vote by a mail in votes that is apart of our broken voting system of our Republic state. Those who support mail in votes have become a part of the problem we Oregonian's are now experiencing, and are seeing a breakdown in our trust in state individuals,

I urge you to support this bill SB210 and do the right thing and restore our trust in the voting system of our state, and as well as government, and stop violating legal people's/citizens rights I respectfully thank you for your time in reading this testimony, as it is to support a better voting system

Thank you for your time

Sincerely

Robb Barnett
