Shame on every person who authored, sponsored, and introduced this bill, who want to do nothing but make life harder for working families. Oregon has had mail voting for decades and it has been nothing but a boon for the busy, hard-working people who have a right to vote, but cannot afford to take six hours off on a work day to stand in line. This bill seeks to punish working class Oregonians for daring to think they have a right to a say in their own government.
