Committee: Senate Committee On Rules
Measure, Appointment or Topic: SB210

To Whom It May Concern,

This letter shall be received in support of SB210. Oregon elected officials have failed to secure mail-in voting. While convenient, mail-in voting has inherent flaws that make it easily susceptible to fraud and abuse. Cynics argue Oregon Democrats desire a system built around easy fraud and abuse. Many publications are calling Oregon Democrats the most corrupt in the nation. Verified fraud in the automatic voter registration is the latest admission. The lack of direct voter verification creates opportunities for ballots to be intercepted, altered, or submitted on behalf of others. Additionally, outdated voter rolls can lead to ballots being sent to individuals who are no longer eligible to vote, further increasing the risk of fraudulent activity. These issues undermine the integrity of our elections and erode confidence in the outcomes.

By eliminating mail-in voting and prioritizing in-person voting, SB210 ensures that every voter is verified at the time of casting their ballot. The requirement for government-issued identification adds an additional layer of security, making it nearly impossible for fraudulent votes to be cast. This approach not only protects the sanctity of each vote but also reinforces the principle of one person, one vote.
