

Submitter: Kristy Cooper

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

I want to be proud of our state again instead of being incredibly embarrassed that I live in such a stupid state. Under the last 40 years of democrat rule we have seen our schools turn into indoctrination centers for shoving transgender down our children's throats, and they are ranked 3-4 from the bottom of the barrel in the country. We have also seen sales from our natural resources plummet, while rates for electricity have multiplied by double digits. Endangered species have become more important than humans. Taxes have been exponentially increased, many times double and triple taxing us, state monies are being misspent, state leaders are being paid by the LaMota drug cartel to keep the cartels in business..... do I need to go on? It is time to take back our state, with day of vote, in person voting, with proof of citizenship id to vote. Money would be saved by not mailing all those ballots, some, probably not very much, money will be spent on ballot counting paperwork. Apparently vote by mail takes three extra weeks after the Election Day to count. Other states use Election Day in person voting and they get it all done in a day, so can we.
