

Submitter: Donavon Reed

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3940

All representatives are here for all oregonians. I say no to this new tax and any other new taxes. No more taxes should be added until we see financial accountability in Oregon. If we can't afford it we don't get it. We don't have funds then live within our means or make cuts. Don't look for the federal government to save us as the majority of our representative wish to oppose the federal government and everything they do and say. Just months ago it was pro federal government how quickly that has changed. Reminder to all if you can't take care of something properly it's not much of a sanctuary (state). Oregon forestry was something to be proud of for decades. It's only under regulations and poor governance this mess has reached new heights. We are looking at leadership problem and an inability to budget. Any new tax is nothing more than a bandaid to a critical wound. To fix a wound sometimes it takes stitches not just first aid. All we ask for is representatives to help Oregonians not to add additional burdens.
