

Submitter: Christy Kay

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

Please do not eliminate mail in voting. The system works, it allows for all to vote with ease, from the comfort of their home. This system has been shown to reduce fraud, increase the ability for everyone to lawfully and rightfully vote. In person voting discriminates against marginalized peoples who don't have access to a day off work to stand in line and vote, or the disabled, sick or elderly who can't get to a voting place, or those who live rurally without transportation to a voting place - among many other ways of quashing voting rights. The current vote by mail system works, and is an example and testimony of fairness in voting, don't break it!
