

Submitter: Carrie Phillips
On Behalf Of:
Committee: Senate Committee On Rules
Measure, Appointment or Topic: SB210

There is no question that Oregon's vote by mail system is secure, free, and fair. Even the discovery of improper voter registrations this past September - 1,259 out of 3,084,684 registered voters for November's election, or a mere 0.04%; and only 9 of them may have voted in November out of 2,308,256 votes cast, which is 0.00039% - are error rates so infinitesimal that they prove how sound our voter registration and election systems are. And notice that critics of our voting system never show their math, or provide evidence of the fraud they are so convinced is happening. This bill is nothing more than red meat for a tragically deluded MAGA base, a demonstration of Republican loyalty to their anti-democratic and mendacious leader, and an attempt to make it harder for Oregonians to vote. It is an embarrassment that this bill is even getting a hearing. Please, vote this bill into the trash bin and seal the lid.
