

Submitter: Nathan Sandberg

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

If something is broken please go ahead and fix it. But only do so in the presence of real facts and actual proof. One person wanting to manipulate the system is not proof. People trying to manipulate the system because they're scared of that one person is also not proof.

I wasn't born here (sorry) but I'm actually proud of Oregon's vote by mail system and think it should be a model for the entire country. Again, please show us data, facts and actual proof the system is flawed before changing it.
