

Submitter: Robert Giedt

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

This has to be the most ridiculous measure I've heard of in this day and age. Voting by mail has been proven to be both secure and convenient, and making in-person voting would disenfranchise thousands of seniors that can't make their way to the ballot box - particularly if the weather is bad during the November voting period. If anything, we should be investigating \*expanding\* voting to allow secure voting on the Internet to provide even more ease of use and access. Please vote this idiotic bill down as soon as possible.
