

Submitter: Wesley Jones

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

Voting via mail has been critical to me in my ability to participate in elections. Ending mail in voting would prevent innumerable people from being able to vote. People such as: those not being able to take off work, people being sick or chronically ill, those who are disabled or have trouble finding transportation. I'm certain there are several other examples we can all think of where mail in voting is a major convenience for the American voter.
