

Submitter: Megan Schulte

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

Requiring in person to vote in person is a form of voter suppression. Especially for those of us that are not able to take off of work to stand in line for hours and/or do not have access to transportation. We all know that even a Federal holiday would not Grant the day off for most workers.

Mail in ballots are already secured with voter signatures and voters are verified when they register. I've had personal experience with a ballot being sent back because my signature wasn't a close enough match to the one on file. This is a good indication that the checks are there and the mail in system is secure.

I am strongly opposed to this bill that that I believe is a form of voter suppression.
