

Submitter: Jay Hammond

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

Let me get this straight - we can get our DMV documents with things like registrations and titles in the mail as well as our driver's license. We get unemployment checks, social security payments and important documents like birth and death certificates in the mail. We get passports in the mail. But for some reason we are expected to give up the ability to vote by mail? Simply ridiculous!

Voting by mail has proven to be highly effective in Oregon. Stories of fraud are a pathetic smokescreen created by one party and one individual that owns that party. Over 50 lost lawsuits proved that voter fraud including vote by mail was nothing more than a sad lie made up attempt create a nefarious alibi for a legitimate Presidential election outcome.

The the goal is to get voters to actually vote, making voting simple, from home is a no-brainer. Why punish people for voting by making them wait for hours in lines at voting stations far from home?

There is absolutely no justification for this bill that is capable of withstanding any legitimate scrutiny.

Whoever is the "brain child" behind this bill should resign immediately.
