Committee: House Committee On Education
Measure, Appointment or Topic: HB2583

I believe every student should get the best education they will need to become a productive citizen as they age. My son is autistic, he can not function in a brick and mortar school system. They have neither the time needed for these kids, nor the patients. Without home school he would not have a chance to be productive in his grown up world. His grades went from bad to a's first three years he had gone. Please take all these kids into consideration they need it. We all need it. The amount of autism today is horrendous. Please know we need all the help we can get, and so do these schools. They have fantastic, caring teachers who take the time to help these kids thrive, and also the parents and grandparents raising them! Please consider the needs of home schools.
