Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or
Topic: SB80

This prohibition makes perfect sense. Waste produced in animal feed lots can seriously pollute ground water and affect the water sources for nearby houses and communities. Animals kept in close confinement can breed and carry bacteria and viruses that can be spread in ground water. Humans can survive very well on plant food, but they need fresh, clean water. If it's a questions of clean water over animal feed lots, there is only one answer. I support this prohibition.
